

EZ Style QMA, SMA and Type N Connectors and Cable Prep Tools for True Position E911 Installations

Available from Times Microwave Systems

For Immediate Release

March, 2005

Times Microwave Systems has recently introduced a series of EZ style connectors and cable prep tools for use with LMR-240 low loss cable. The **ST-240EZ** tool prepares the cable to the exact dimensions in one simple step while the **DBT-02** tool removes the burrs from the exposed center conductor facilitating field installation of the EZ non-solder connectors. List price for the **ST-240EZ** (3190-1722) prep/strip tool is \$51.00 while the list price for the **DBT-02** (3190-1706) debur tool is \$27.00. Both of these tools are available from stock.

The QMA male (3190-1533) has a list price of \$10.50, the QMA male RA (3190-1539) has a list price of \$13.00, the SMA male (3190-1530) has a list price of \$7.50, the SMA male RA (3190-1536) has a list price of \$10.00 and the N male (3190-1127) has a list price of \$7.50. These are all EZ non-solder connectors, which are available for LMR-240 and widely used with True Position E911 installations. These connectors are rugged and have been optimized for ease of termination and have excellent electrical performance. Each connector is supplied with an adhesive lined ATUM boot and detailed termination instructions.

Times Microwave Systems, a Smiths Group plc company is the leader in the design and manufacture of coaxial cables for RF and microwave applications. CDM Electronics, Inc. is an authorized stocking distributor for Times Microwave Systems.
