Updated High Power RF Coaxial Cables & Assemblies Brochure

Available From Times Microwave Systems

Times Microwave Systems has recently announced the availability of its updated **High Power RF Coaxial Cables & Assemblies** brochure covering 50 Ohm flexible cables for use in high power applications such as high power radar, pulse power, medical (MRI), semi-conductor manufacturing, laser and particle physics. Cables are available for use at continuous operating temperatures up to 250°C. The product range includes MIL-C-17 cables, special Times-designed high power cables and LMR-LLPL[®] cables. Custom high power coaxial cable assemblies are also available. Brochure updates include an expanded selection of high power cables as well as additional information on connectors and cables assemblies.

These cables and the updated brochures are available from CDM Electronics, Inc.
