

Quick Interconnect Solutions

Winchester's Quick Connect series was developed to help take the labor and space constraints out of system designs.

Winchester Electronics is pleased to introduce two new connectors to our "Quick Connect" family of RF connectors - the QC-SMA™ and the QC-N.

QC-SMA™ & QC-N Product Benefits:

- Push/Pull connection system allows for quicker mating.
- When mated, the connectors can rotate 360 degrees.
- Electrical performance up to 6 GHz when compared to a standard SMA.
- Compact design that utilizes SMA standard spacing down to .500 centers, and Type N Standard down to .875 centers.
- Designs are available for both flexible and semi-rigid type cables.
- Visit www.cdmelectronics.com for more information.
