

NEW Prep Tools for IM R® Cables

All CST prep tools are rugged and lightweight and provide a consistently sharp cut of the dielectric for best 4 SW R performance. The list price for each unit is .11000Y

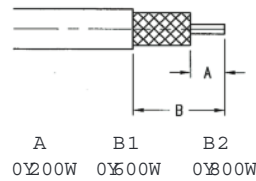

C ST-195-200 (3192-102)

- Combination feature a low speed preparation of IM R-195 and IM R-200 cables for either straight or right angle connector attachments
- Suitable for use with most IM R-195 and 200 connectors
- Requires use of separate deburr tool (DBT-U)

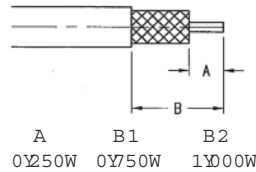

C ST-240A (3192-152)

- Combination feature a low speed preparation of IM R-240 cables for either straight or right angle clamp connector attachments
- Suitable for use with most IM R-240 connectors
- Requires use of separate deburr tool (DBT-U)

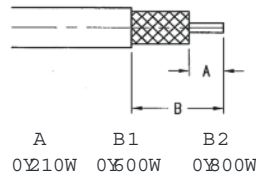

C ST-300 (3192-084)

- Combination feature a low speed preparation of IM R-300 cables for either straight or right angle connector attachments
- Suitable for use with most IM R-300 connectors
- Requires use of separate deburr tool (DBT-U)

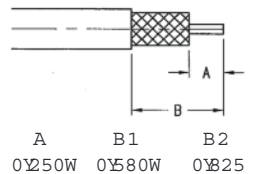

C ST-400 (3192-004)

- Combination feature a low speed preparation of IM R-400 cables for either clamp or clamp connector attachments
- Suitable for use with virtually all IM R 400 connectors
- Includes a built-in deburr tool eliminating the need for a separate deburr tool

C ST-500 (3192-075)

- Combination feature a low speed preparation of IM R-500 cables for either clamp or clamp connector attachments
- Suitable for use with most IM R-500 connectors
- Includes a built-in deburr tool eliminating the need for a separate deburr tool

C ST-600 (3192-052)

- Combination feature a low speed preparation of IM R-600 cables for either clamp or clamp connector attachments
- Suitable for use with all IM R-600 connectors
- Includes a built-in deburr tool eliminating the need for a separate deburr tool
