CDM Electronics Receives AS9100:2016 Reccreditation

Turnersville, NJ, May 16, 2022... CDM Electronics has announced the Company received AS9100:2016 continued accreditation for fulfilling standards required for aviation, space and defense organizations.

“Achieving AS9100 reccreditation represents CDM’s ongoing efforts to supply the aerospace and defense industry with superior products and services, which meet and frequently surpass customer requirements and industry specifications,” said Mike Liccketto, Quality Systems Document Control Specialist at CDM Electronics. “This reccreditation is recognized proof of quality in the global aerospace and defense sectors and guarantees product traceability and end-to-end verification. We are proud of our entire staff who are dedicated to consistently improving the standards of our quality management system.”

CDM’s AS9100:2016 certificate can be viewed at:

https://www.cdmelectronics.com/wp-content/uploads/2022/05/AS0016A_10001701-AS0016A_EN.pdf

Created in 1998 by the International Aerospace Quality Group (IAQG), the AS9100 series of standards formulates requirements for a quality management system for companies in the aerospace and defense industries. In addition to customer-specific requirements for processes, especially at the interfaces of the supply chain, the standards are based on the specifications of the aerospace authorities.

CDM’s interconnect products and engineered cable assemblies are widely employed by the world’s leading aerospace and defense companies. They are most commonly specified in mission-critical tactical communications systems, commercial and private aircraft avionic systems, commercial aircraft onboard

entertainment systems, rotary wing aircraft avionics and onboard electronics, military aircraft avionics and fire control, as well as in space flight applications.

About CDM

For almost 30 years, [CDM Electronics](#) has delivered interconnect product and engineered cable assembly solutions to the world's leading aerospace, military, telecom, automotive, industrial, commercial, and alternative energy providers. Renowned for its unsurpassed levels of customer service and support, the company supplies Original Equipment Manufacturers (OEMs) with full lines of standard and specialty connectors including circular, Mil-Spec, DIN, power, PROFIBUS, rectangular, and RF devices. CDM employs documented and controlled systems in its value-added division, which specializes in mission critical [cable assembly](#), including [RF cable assembly](#), [military cable assembly](#), [power cable assembly](#), and box builds. The company's ISO and AS9100 Certified headquarters is in Turnersville, NJ. CDM maintains a regional office in Richardson, TX.
