**CDM Electronics Is Now An Authorized Stocking Distributorship
For Positronic® Grounding Plates**

Turnersville, NJ, November 21, 2023... CDM Electronics has announced an agreement with Positronic® to stock and distribute their line of high-reliability rectangular Grounding Plates, contacts and accessories at their Turnersville, NJ location.

Positronic, a subsidiary of Amphenol Corporation, is one of the world's leading manufacturers of interconnect products for aeronautical applications. CDM now provides the full range of proven and affordable grounding plates designed for aircraft applications. CDM also stocks Positronic's Rack & Panel connector groups.

"The addition of Positronic's time-tested Grounding Plate line complements the depth of CDM's existing aero-specific product mix", said Danielle Richardson, Product Manager at CDM. "We're looking forward to providing such a fundamental and important line to CDM's customers."

Positronic rectangular Grounding Plates are available in five configurations with 14 and 34 contacts, current ratings up to 13 Amps and a working voltage up to 500 VAC. All configurations allow multiple grounds to one location and low resistance to ground. Solid machined contacts accept a wide range of wire sizes and expanded -65°C to +150°C operating temperature range can accommodate virtually all in-flight conditions.

With the inclusion of the Positronic Grounding Plate line, CDM will have over 130,000 different interconnects and accessories available to support virtually every military, industrial and commercial application.

About CDM

For 30 years, CDM Electronics has delivered interconnect product and engineered cable assembly solutions to the world's leading aerospace, military, telecom, automotive, industrial, commercial, and alternative energy providers. Renowned for its unsurpassed levels of customer service and support, the company supplies Original Equipment Manufacturers (OEMs) with full lines of standard and specialty connectors including circular, Mil-Spec,

DIN, power, PROFIBUS, rectangular, and RF devices. CDM employs documented and controlled systems in its value-added division, which specializes in mission critical cable assembly, including RF cable assembly, military cable assembly, power cable assembly, and box builds. The company's ISO and AS9100 Certified headquarters is in Turnersville, NJ. CDM maintains a regional office in Richardson, TX.
